Sample specification

Sampling by: Owner/Sender Independent authority (e.g. veterinarian or breed warden)

Sample material: buccal swabs (2 samples) EDTA-blood (approx. 0.5 ml)

Please perform the buccal swab thoroughly and make sure that the dog being tested has not eaten anything for at least 30 minutes.

Further information about sample collection can be found on our homepage.

Date of sampling: _____

I hereby confirm that the identity of the above-listed animal was verified

and that the samples derive from the above-listed animal.

stamp/signature independent authority

Submission of results

For every animal included in the parentage verification a DNA-Profile is needed.

Parentage verification report is free of charge.

Test-results to: Owner/Sender Veterinarian

Invoice to: Owner/Sender Veterinarian

Certificates (DNA-profiles) Certificates are available for an additional charge of 7.14 € per animal.

- Certificates are available only if Chip-No. is provided. It is recommended that sampling is carried out by an independent authority (e.g. veterinarian or breed warden) to confirm sample origin.
- If DNA-profiles have to be generated for all involved individuals, parentage verification is free of charge, independent of the number of samples submitted. If DNA-profiles are provided by the submitter (e.g. DNA-profiles of the parents), parentage verification will cost 23.80 € (incl. VAT).
